DETAILED ACTION

Terminal Disclaimer

The terminal disclaimers filed on 06/04/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patents indicated in the terminal disclaimers has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1, 3-4, 7, 13, 31, 37-38, 41, 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin (US 2002/0171692 A1) in view of Nozawa (US 5701147).

Regarding to claims 1, 31, 37-38, 41, 49:

Martin discloses a method/apparatus for printing wallpaper onto a continuous web of media (FIG. 2, element 27), comprising the steps of:

utilizing an on-demand printer comprising a cabinet/frame (FIG. 2, element 18) in which is located a media path which extends from a media loading area (FIG. 2, element 24) to a winding area/dispensing slot (FIG. 2, element 26), there being a printhead (FIG. 2, element 20) located across the media path, there being a processor (FIG. 2, element 38) which accepts

operator inputs from one or more input devices (FIG. 2, element 32) and which controls the printer;

using one or more input devices which communicate with the processor to capture data from an operator regarding a specification; running the printer according to the data; printing a single wallpaper product (*FIG. 1, element 10*) on the continuous media web, on demand, according to a selected pattern and configuration (*paragraphs [0009]-[0010]*).

changing the pattern according to a new datum from an operator and then printing a new wallpaper product onto the same continuous media web (paragraph [0010]: A user loads a blank roll of wallpaper in the printer and inputs one or more personal images (datum) that is/are printed on the blank roll. In case of more than one personal images are inputted, there are more than one wallpaper products associated with the inputted personal images (datum) are printed on the same loaded blank roll of wallpaper (continuous media web)).

• Martin also is silent wherein the printhead is full width.

Nozawa discloses a printing apparatus comprising full width printheads (FIG. 9, element 204) for forming images across a moving printing medium (FIG. 9, element 203).

Therefore, it would have been obvious for one having ordinary skill in the art at the time invention was made to modify Martin's printhead to be full width printhead as disclosed by Nozawa. The motivation for doing so would have been to be able to print the entire width of the printing medium without scanning the printhead to gain printing speed as taught by Nozawa (column 1, lines 30-39; column 3, lines 57-62).

• Martin also discloses the following claimed invention:

Application/Control Number: 10/760,266

Art Unit: 2853

Regarding to claim 3: storing to a storage device accessible to the processor and internal to the cabinet, a plurality of selectable files for describing the patterns for printing onto the media (FIG. 1-2, element 30).

Regarding to claims 4, 7: providing the printer with a video display for depicting the selected pattern or display information relating to a roll (FIG. 2, element 34).

Regarding to claim 13: the specification for an operator's requirements comprises a pattern and the configuration; the configuration being one or more parameters selected from the group comprising: roll length, a roll slitting arrangement, one or more modifications to the pattern, or a selection of media to be printed on (paragraph [0010]).

Regarding to claims 31, 37, 41: the winding area adapted to removably retain a core and wind into it, wallpaper produced by the printer (FIG. 2, element 26), wherein the length and design of the roll are determined by the operator inputs (paragraph 0010]).

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Martin (US 2002/0171692 A1) in view of Nozawa (US 5701147) applied to claim 1, and further in view of Stoffel et al. (US 6412990).

Martin, as modified, discloses the claimed invention as disccused above except using the video display as a touchscreen input device to capture operator preferences.

Stoffel et al. discloses an printing apparatus having a video display as a touchscreen (FIG. 15, element 42) input device to capture operator/customer preferences to allow the operator/customer to custom printing images by simply touching the viewing screen (column 8, lines 55-60).

Therefore, it would have been obvious for one having ordinary skill in the art at the time invention was made to modify Marin's video display (as modified) as a touchscreen as disclosed by Stoffel et al. The motivation for doing so would have been to allow an operator/customer to custom printing images by simply touching the viewing screen as taught by Stoffel et al. (*column*

8, lines 55-60).

4. Claims 39-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin (US 2002/0171692 A1) in view of Nozawa (US 5701147) applied to claim 1, and further in view of Goldstein (US 2002/0069078 A1).

Martin, as modified, discloses the claimed invention as discussed above but is silent about charging a customer for the roll or obtaining/attempting to obtain a fee from a franchisee.

Goldstein discloses a system for creating custom wallpaper including a program to charge and obtain fee from customers ordered printed wallpaper rolls (FIG. 2, steps 208, 210, 212, 214).

Therefore, it would have been obvious for one having ordinary skill in the art at the time invention was made to modify Marin's apparatus (as modified) to include means for charging and obtaining fee from a customer as disclosed by Goldstein et al. The motivation for doing so would have been to allow an operator/customer to purchase created custom wallpaper as taught by Goldstein (*paragraphs* [0043]-[0046]).

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. The new rejection is made based on the previous cited prior art with new citations and new explanations.

Conclusion

Application/Control Number: 10/760,266

Art Unit: 2853

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM S. NGUYEN whose telephone number is (571)272-2151. The examiner can normally be reached on 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, STEPHEN D. MEIER can be reached on (571)272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
